

BIOELECTROMAGNETIC MEDICINE

Edited by PAUL J. ROSCH, M.D. *The American Institute of Stress, Yonkers, New York, U.S.A., and New York Medical College, Valhalla, New York, U.S.A.*; and MARKO S. MARKOV, Ph.D. *Research International, Buffalo, New York, U.S.A.*

April 2004 / 864 pp. / ISBN: 0-8247-4700-3 / E-ISBN: 0-8247-5717-3 / List Price: \$195.00 / Special Offer: \$156.00

The only comprehensive resource that reviews clinical applications of evidence-based bioelectromagnetic therapies for disorders ranging from cancer, coronary disease, and obesity to neuropsychiatric disturbances, including Parkinson's disease; epilepsy; multiple sclerosis; tinnitus; macular degeneration; migraine; musculoskeletal pain syndromes; depression; insomnia; and anxiety.

Bioelectromagnetic Medicine

- thoroughly explains the biologic effects of magnetic and electromagnetic fields and the importance of dosimetry in determining clinical efficacy and safety
- presents examples of cutting-edge breakthroughs supported not only by rigid clinical trials but also by solid basic science research
- identifies promising new approaches based on research advances in the U.S., Europe, Eastern Europe, Russia, and Pacific Rim countries

CONTENTS

PREFACE

INTRODUCTION

Potential Therapeutic Applications of Nonthermal Electromagnetic Fields: Ensemble Organization of Cells in Tissue as a Factor in Biological Field Sensing
W. Ross Adey

Signal Shapes in Electromagnetic Therapies: A Primer *A. R. Liboff*

Magnetic Field Generation and Dosimetry *Stefan Engström*

Image-Guided Electromagnetic Therapy *Frank S. Prato*

THE EVOLUTION OF BIOELECTROMAGNETIC THERAPIES

The Theology of Electricity
Dennis Stillings

Recent Developments in Bioelectromagnetic Medicine
James L. Oschman

Evolution of Electrotherapy: From TENS to Cyberpharmacology
C. Norman Shealy, Saul Liss, and Bernard S. Liss

Origin and Evolution of Vagal Nerve Stimulation: Implications for Understanding Brain Electrodynamics, Neuroendocrine Function, and Clinical Applications *Jacob Zabara*

Chronic Therapeutic Brain Stimulation: History, Current Clinical Indications, and Future Prospects *Alon Y. Mogilner, Alim-Louis Benabid, and Ali R. Rezai*

MECHANISMS OF ACTION AND THEORETICAL CONSIDERATIONS

Quantum Holography: A Basis for the Interface Between Mind and Matter *Edgar Mitchell*

Subtle Energies and Their Roles in Bioelectromagnetic Phenomena
William A. Tiller

Electromagnetism versus Bioelectromagnetism
William A. Tiller

A Fundamental Basis for the Effects of EMFs in Biology and Medicine: The Interface Between Matter and Function
J. Benveniste

Electromagnetic Techniques in Neural Therapy *K. A. Jenrow and A. R. Liboff*

Is There an Electrical Circulatory System that Communicates Internally and Externally? *Paul J. Rosch and Björn E. W. Nordenström*

NEUROLOGIC, MUSCULOSKELETAL AND SOFT TISSUE APPLICATIONS

Magnetic and Electromagnetic Field Therapy: Basic Principles of Application for Pain Relief
Marko S. Markov

Deep Brain Stimulation for Parkinson's Disease and Movement Disorders *E. Oscar Richter and Andres M. Lozano*

Noninvasive Pulsed Electromagnetic Therapy for Migraine and Multiple Sclerosis
Martha S. Lappin

Repetitive Transcranial Magnetic Stimulation (rTMS) for Depression and Other Indications *Mark S. George, Ziad Nahas, F. Andrew Kozel, Xingbao Li, K. Yamanaka, A. Mishory, and Daryl E. Bohning*

Repetitive Transcranial Magnetic Stimulation for Tinnitus
Paul J. Rosch

Low-Energy Emission Therapy (LEET): Current Status and Future Directions *Boris Pasche and A. Barbault*

Vagus Nerve Stimulation for the Treatment of Epilepsy
Steven C. Schachter

—Continued from front—

Electrical Stimulation of the Internal Globus Pallidus in Advanced Generalized Dystonia

Laura Cif, N. Vayssiere, S. Hemm, M. Azais, C. Monnier, E. Hardouin, A. Gannau, M. I. Zanca, and Philippe Coubes

Peripheral Stimulation for Pain Control and the Development of Modern Transcutaneous Stimulation for Pain

Donlin M. Long and Norman Hagfors

Low-Frequency Electromagnetic Field Effects on Lymphocytes: Potential for Treatment of Inflammatory Diseases

Gabi Nindl, Mary T. Johnson, and Walter X. Balcavage

Orthopedic Clinical Application of Biophysical Stimulation in Europe

Ruggero Cadossi and Gian Carlo Traina

Electromagnetic Stimulation in Orthopedics: Biochemical Mechanisms to Clinical Applications

James T. Ryaby

Application of Electromagnetic Fields in Traumatology and Orthopedics

Imants Detlavs

Neurorehabilitation of Standing and Walking After Spinal Cord Injury

Tadej Bajd

Electromagnetic Linkages in Soft Tissue Wound Healing

Harvey N. Mayrovitz

Electrical Wound Healing

David Cukjati and Rajmond Savrin

Pulsed Magnetic Therapy for the Treatment of Incontinence, Disuse Atrophy, Muscle Spasm, and Muscle Reeducation to Increase Mobility

Kent Davey

Coblation Radiofrequency Discal Nucleoplasty: A Novel Approach to the Management of Acute Disc Herniation

Arra S. Reddy and Joshua A. Hirsch

CARDIOVASCULAR DISORDERS AND CANCER

Electricity and the Heart: Innovation and the Evolution of Cardiac Pacing

Kirk Jeffrey

The Energetic Heart: Biomagnetic Communication Within and Between People

Rollin McCraty

Static Magnetic Fields and Microcirculation

C. Ohkubo and H. Okano

Magneto-Metabolic Therapy for Advanced Malignancy and Cardiomyopathy

Demetrio Sodi Pallares and Paul J. Rosch

Electromagnetic Fields as an Adjuvant Therapy to Antineoplastic Chemotherapy

Joseph R. Salvatore and Marko S. Markov

Can Magnetic Fields Inhibit Angiogenesis and Tumor Growth?

Marko S. Markov, Calvin D. Williams, Ivan L. Cameron, W. Elaine Hardman, and Joseph R. Salvatore

Electroporation for Electrochemotherapy and Gene Therapy

Damijan Miklavcic and Tadej Kotnik

Electroporation Therapy: Treatment of Cancer and Other Therapeutic Applications

Dietmar Rabussay, Georg Widera, and Martin Burian

The Paradigm of Biologically Closed Electrical Circuits and Its Clinical Applications

Björn E. W. Nordenström and Jorgen Nordenström

Electrochemical Therapy of Tumors

Yuling Xin, Hengchan Zhao, Wei Zhang, Chaoyang Liang, Zaiyeng Wang, and Ganzhong Liu

CRANIOELECTRICAL STIMULATION AND OTHER INDICATIONS

Cranial Electrotherapy Stimulation for Anxiety, Depression, Insomnia, Cognitive Dysfunction, and Pain

Daniel L. Kirsch and Ray B. Smith

Low-Intensity Millimeter Waves in Biology and Medicine

O. V. Betskii and N. N. Lebedeva

The Use of Electrical Stimulation to Treat Morbid Obesity

Mitchell Roslin and Marina Kurian

BioCurrent Therapy for Macular Degeneration

John B. Jarding and George D. O'Clock

PERMANENT MAGNET APPLICATIONS

Clinical Trials Involving Static Magnetic Field Applications

Agatha P. Colbert

Pain-Free and Mobility-Free Magnetic Force in Orthodontic Therapy

A. M. Blechman

CONCLUSION

Concluding Comments

Paul J. Rosch and Marko S. Markov
